

These tungsten carbide tools run between 4 & 30,000 rpm, and fit Dremels, die grinders and other rotary tools.

With shaft sizes of 1/8" & 1/4", there is an incredible degree of control, with clean chip free cutting.

Most come in 3 grit ranges, fine (yellow), medium, (green) and coarse (orange)

**Made in the USA**

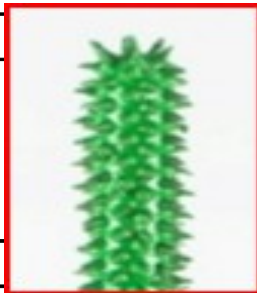

The part # has 3 components; 1st 2 digits = shaft size in inches, 2nd letters= shape, 3rd is head diameter "

## BALL NOSE

Example 14BN58: 14= 1/4" shaft  
BN = Ball Nose & 58 = 5/8" head diameter
